1 INTRODUCTION AND SUMMARY

INTRODUCTION

Data source:
I used the Environment Canada homogenized climate records archive, downloaded October 12, 2018 from
https://www.canada.ca/en/environment-climate-change/services/climate-change/science-research-data/climate-trends-variability/adjusted-homogenized-canadian-data/surface-air-temperature-access.html

Data used: Monthly average daytime maximum temperatures ("TMax"). For analysing long term trends in connection to climate, TMax is a better representative of the changing heat content of the boundary layer than nighttime minimum (TMin) temperatures (McNider et al. 2012), as the latter are very sensitive to changes over time in the nearby land surface.

Time spans: Each section is based on data selected by start date going back 130 years (to 1888), 100 years (to 1918), 80 years (to 1938), 60 years (1958) and 40 years (1978). Stations were only selected if they had data at least up to 2016.

Trends: are all in **deg C per decade** and are calculated using ordinary least squares with standard errors computed using the autocorrelation-robust method of Vogelsang and Franses (2005).

Graphics: Each section shows the following graphs.

- A summary map (laid out in lat by lon with trends colour-coded) of trends in deg C/decade
- Scatter plots of annual temperature trends by latitude, longitude and elevation elevation (annual) with overlaid lowess smoothed lines
- Scatter plots of monthly temperature trends by latitidue. In the early years there are very few northern stations so the scatter is piled up between 40 and 50 degrees. By 1980 the sample goes well into the arctic.
- Boxplots of temperature trends by month. The midline is the median trend, the box outlines the lower 25% and upper 25% ranges and the whiskers indicate the data extend with outliers removed

Tables: Each section shows the following information

- Summary of records: Monthly averages and, for each month, fraction exhibiting statistically significant warming and cooling across the indicated interval

- A table organized alphabetically by city within province showing monthly and annual trends and 95% confidence intervals, along with coding: (statistically significant) Warming or Cooling, or no significant trend.

Tables headings in each section:

r_stn	Station (city)
r_prov	Province
r_mnum	Month number (1—13, 13 is Annual average)
r_lat	Latitude
r_lon	Longitude
r_elev	Elevation in m above sea level
r_earliest	First year in that station's record
r_start	Start year of analysis (final year = 2017)
r_month	Month of analysis
r_trend	Temperature trend in **degrees C per decade**
r_pm	+/- symbol
r_ci	95% Confidence interval width
r_code	Indicator of inference about trend

SUMMARY

Here are a few points that you might notice in the graphs and tables that follow.

1. There is a tradeoff between the number of available stations and the length of record. There are 30 stations with data back to 1888 and 267 stations with data back to 1978.
2. Over the past 130 years the median warming rate in the average daytime high is about 0.1 degrees per decade or 1 degree per century.
3. Over long samples there is little polar amplification (increased warming with latitude) but it does appear in fall and winter months in more recent subsamples.
4. Over the past 100 years, warming has been stronger in winter than summer or fall. October has cooled slightly. The Annual average daytime high has increased by about 0.1 degrees per decade. 72 percent of stations did not exhibit statistically significant warming or cooling.
5. Since 1939 there has been virtually no change in the median July and August daytime highs across Canada, and October has cooled slightly.
6. There are 247 stations with data back to 1958. However as the time span decreases the range of observed trends greatly expands. All months exhibit median warming but with much wider variability.

7. Post-1958 Arctic coverage is much better than earlier. There is little indication of polar amplification.
8. Post-1978 the range of trends grows dramatically. The median trend in March and April is slightly negative.
9. Some polar amplification is observed in the post-1978 annual trend, mainly due to the late fall and early winter months.

Canada-wide summary using 30 stations with data back to 1888 selecting data after 1888

Jan Summary: avg trend = 0.09 median = 0.04 C/decade; fraction warming = 0.133 ; fraction cooling = 0
Feb Summary: avg trend = 0.19 median = 0.17 C/decade; fraction warming = 0.667 ; fraction cooling = 0
Mar Summary: avg trend = 0.13 median = 0.15 C/decade; fraction warming = 0.5 ; fraction cooling = 0
Apr Summary: avg trend = 0.09 median = 0.07 C/decade; fraction warming = 0.267 ; fraction cooling = 0
May Summary: avg trend = 0.12 median = 0.09 C/decade; fraction warming = 0.4 ; fraction cooling = 0
Jun Summary: avg trend = 0.12 median = 0.07 C/decade; fraction warming = 0.333 ; fraction cooling = 0
Jul Summary: avg trend = 0.12 median = 0.07 C/decade; fraction warming = 0.133 ; fraction cooling = 0
Aug Summary: avg trend = 0.17 median = 0.12 C/decade; fraction warming = 0.367 ; fraction cooling = 0
Sep Summary: avg trend = 0.14 median = 0.12 C/decade; fraction warming = 0.2 ; fraction cooling = 0
Oct Summary: avg trend = 0.06 median = 0.04 C/decade; fraction warming = 0.033 ; fraction cooling = 0
Nov Summary: avg trend = 0.11 median = 0.09 C/decade; fraction warming = 0.367 ; fraction cooling = 0
Dec Summary: avg trend = 0.08 median = 0.1 C/decade; fraction warming = 0.333 ; fraction cooling = 0.033
Annual Summary: avg trend = 0.12 median = 0.1 C/decade; fraction warming = 0.433 ; fraction cooling = 0

Canada-wide summary using 133 stations with data back to 1918 selecting data after 1918

Jan Summary: avg trend = 0.18 median = 0.18 C/decade; fraction warming = 0.075 ; fraction cooling = 0
Feb Summary: avg trend = 0.18 median = 0.16 C/decade; fraction warming = 0.278 ; fraction cooling = 0
Mar Summary: avg trend = 0.17 median = 0.16 C/decade; fraction warming = 0.316 ; fraction cooling = 0
Apr Summary: avg trend = 0.15 median = 0.15 C/decade; fraction warming = 0.301 ; fraction cooling = 0.008
May Summary: avg trend = 0.08 median = 0.07 C/decade; fraction warming = 0.15 ; fraction cooling = 0
Jun Summary: avg trend = 0.06 median = 0.03 C/decade; fraction warming = 0.098 ; fraction cooling = 0
Jul Summary: avg trend = 0.01 median = 0 C/decade; fraction warming = 0.045 ; fraction cooling = 0.068
Aug Summary: avg trend = 0.07 median = 0.05 C/decade; fraction warming = 0.09 ; fraction cooling = 0.015
Sep Summary: avg trend = 0.11 median = 0.1 C/decade; fraction warming = 0.12 ; fraction cooling = 0
Oct Summary: avg trend = -0.01 median = -0.03 C/decade; fraction warming = 0.03 ; fraction cooling = 0.038
Nov Summary: avg trend = 0.1 median = 0.11 C/decade; fraction warming = 0.218 ; fraction cooling = 0
Dec Summary: avg trend = 0.13 median = 0.13 C/decade; fraction warming = 0.241 ; fraction cooling = 0
Annual Summary: avg trend = 0.1 median = 0.1 C/decade; fraction warming = 0.278 ; fraction cooling = 0

Canada-wide summary using 182 stations with data back to 1938 selecting data after 1938

Jan Summary: avg trend = 0.26 median = 0.25 C/decade; fraction warming = 0.082 ; fraction cooling = 0
Feb Summary: avg trend = 0.19 median = 0.16 C/decade; fraction warming = 0.291 ; fraction cooling = 0
Mar Summary: avg trend = 0.2 median = 0.19 C/decade; fraction warming = 0.319 ; fraction cooling = 0
Apr Summary: avg trend = 0.15 median = 0.14 C/decade; fraction warming = 0.148 ; fraction cooling = 0.005
May Summary: avg trend = 0.12 median = 0.1 C/decade; fraction warming = 0.148 ; fraction cooling = 0.016
Jun Summary: avg trend = 0.15 median = 0.1 C/decade; fraction warming = 0.165 ; fraction cooling = 0
Jul Summary: avg trend = 0.06 median = 0.02 C/decade; fraction warming = 0.055 ; fraction cooling = 0.011
Aug Summary: avg trend = 0.12 median = 0.07 C/decade; fraction warming = 0.132 ; fraction cooling = 0.005
Sep Summary: avg trend = 0.16 median = 0.15 C/decade; fraction warming = 0.104 ; fraction cooling = 0.005
Oct Summary: avg trend = -0.06 median = -0.08 C/decade; fraction warming = 0.038 ; fraction cooling = 0.11
Nov Summary: avg trend = 0.07 median = 0.09 C/decade; fraction warming = 0.071 ; fraction cooling = 0
Dec Summary: avg trend = 0.07 median = 0.11 C/decade; fraction warming = 0.115 ; fraction cooling = 0.011
Annual Summary: avg trend = 0.12 median = 0.12 C/decade; fraction warming = 0.231 ; fraction cooling = 0

Canada-wide summary using 247 stations with data back to 1958 selecting data after 1958

Jan Summary: avg trend = 0.54 median = 0.5 C/decade; fraction warming = 0.534 ; fraction cooling = 0.004
Feb Summary: avg trend = 0.21 median = 0.28 C/decade; fraction warming = 0.186 ; fraction cooling = 0.004
Mar Summary: avg trend = 0.23 median = 0.27 C/decade; fraction warming = 0.219 ; fraction cooling = 0.004
Apr Summary: avg trend = 0.23 median = 0.25 C/decade; fraction warming = 0.186 ; fraction cooling = 0
May Summary: avg trend = 0.21 median = 0.2 C/decade; fraction warming = 0.206 ; fraction cooling = 0
Jun Summary: avg trend = 0.11 median = 0.09 C/decade; fraction warming = 0.158 ; fraction cooling = 0.004
Jul Summary: avg trend = 0.12 median = 0.12 C/decade; fraction warming = 0.105 ; fraction cooling = 0.008
Aug Summary: avg trend = 0.18 median = 0.18 C/decade; fraction warming = 0.227 ; fraction cooling = 0.004
Sep Summary: avg trend = 0.32 median = 0.35 C/decade; fraction warming = 0.34 ; fraction cooling = 0.008
Oct Summary: avg trend = 0.05 median = 0.03 C/decade; fraction warming = 0.077 ; fraction cooling = 0.028
Nov Summary: avg trend = 0.2 median = 0.22 C/decade; fraction warming = 0.04 ; fraction cooling = 0.004
Dec Summary: avg trend = 0.23 median = 0.29 C/decade; fraction warming = 0.211 ; fraction cooling = 0.008
Annual Summary: avg trend = 0.22 median = 0.23 C/decade; fraction warming = 0.534 ; fraction cooling = 0.004

Canada-wide summary using 267 stations with data back to 1978 selecting data after 1978

Jan Summary: avg trend = 0.49 median = 0.55 C/decade; fraction warming = 0.041 ; fraction cooling = 0
Feb Summary: avg trend = 0.34 median = 0.25 C/decade; fraction warming = 0.067 ; fraction cooling = 0
Mar Summary: avg trend = -0.01 median = -0.07 C/decade; fraction warming = 0.022 ; fraction cooling = 0.037
Apr Summary: avg trend = 0.01 median = -0.01 C/decade; fraction warming = 0.022 ; fraction cooling = 0
May Summary: avg trend = 0.11 median = 0.18 C/decade; fraction warming = 0.037 ; fraction cooling = 0.011
Jun Summary: avg trend = 0.1 median = 0.18 C/decade; fraction warming = 0.086 ; fraction cooling = 0
Jul Summary: avg trend = 0.09 median = 0.16 C/decade; fraction warming = 0.131 ; fraction cooling = 0
Aug Summary: avg trend = 0.12 median = 0.24 C/decade; fraction warming = 0.21 ; fraction cooling = 0
Sep Summary: avg trend = 0.45 median = 0.57 C/decade; fraction warming = 0.371 ; fraction cooling = 0.004
Oct Summary: avg trend = 0.22 median = 0.26 C/decade; fraction warming = 0.24 ; fraction cooling = 0.004
Nov Summary: avg trend = 0.36 median = 0.39 C/decade; fraction warming = 0.097 ; fraction cooling = 0
Dec Summary: avg trend = 0.27 median = 0.31 C/decade; fraction warming = 0.067 ; fraction cooling = 0.007
Annual Summary: avg trend = 0.21 median = 0.24 C/decade; fraction warming = 0.281 ; fraction cooling = 0
